

## What they say...

"Catherine and Emma worked really hard to achieve their qualification and also completed the functional skills in Maths, English and ICT. It was great that they were both able to refresh on these skills and take forward new IT skills that they can now both use within their job role.

It was evident that the course not only gave them new skills in existing IT but gave them confidence to look further, question and research into possibilities and capabilities of other IT systems and software."

- Rebecca Hodgson (Assessor)

"It was good to have a refresher in Maths and English. Even though I know how to use computers confidently it was great to find other tips and tricks which make using them even easier. Becky Hodgson from First College is very patient, friendly, helpful and has been fantastic throughout the course."

- Emma (Apprentice)

"When I heard that the course was free, I couldn't say no. Whilst it was hard work at times, refreshing my maths knowledge and learning about social media/web design has really helped me at work. Many thanks to Becky Hodgson at First College who supported us both."

- Catherine (Apprentice)
